About FDP:

The landscape of higher education is undergoing a seismic shift. Modern college teachers are no longer just repositories of information; they are facilitators of learning, emotional anchors for students, and leaders within their academic ecosystems. To thrive in this evolving environment, educators must balance the integration of cutting-edge technology with deeply human-centric teaching practices.

This multidisciplinary Faculty Development Programme (FDP) is strategically curated to address this duality. By blending emerging technical paradigms like Artificial Intelligence with critical human dimensions—such as leadership, adolescent psychology, and holistic personal healing—this FDP aims to equip college educators with a comprehensive toolkit for the modern classroom

Objectives of this FDP is to help educators to:

1. Learn emerging technologies useful for education.
2. Understand adolescent behaviour in the age of AI.
3. Enhance professional development and leadership skills.
4. Promote inner child healing and emotional well-being.
5. Understand healing through food from an Ayurvedic perspective.

Learning Outcomes:

1. Integrate emerging ed-tech frameworks and AI tools smoothly into their daily lecture workflows.
2. Decode and constructively guide complex behavioral patterns in tech-native students.
3. Deploy advanced self-care techniques, ayurvedic nutrition habits, and psychological grounding exercises to prevent workplace burnout.
4. Assume proactive leadership roles within their respective institutional frameworks.

Programme Schedule

Date	Title	Resource Person
12-June-2026	Adolescents & Young Adults: Issues and concerns in the Age of AI	Dr. Geetika Dutta, Dean Academics, Bharatiya Vidya Bhavan, Delhi Kendra.
